Work Experience

Honda Cars India Ltd. (HCIL)

Marketing Analytics & Digital Customer Engagement Intern — May 2026 – July 2026

- The project focused on **product positioning** and **customer engagement** using **AIDA and STP concepts**, with analysis of **55K+ customers across 293 dealers** to understand **WhatsApp engagement** opportunities.
- Out of 293 dealers, **107 were identified as priority dealers**, covering **72.9% of the active customer base**. The analysis also highlighted a **multilingual opportunity for 76.5% of customers** and two models that accounted for **83.7% of the customer base**.
- **Customer journeys** were studied from WhatsApp interactions and **lead generation** to **test-drive bookings and loyalty**, highlighting where customers dropped off during the process, including PC/contract stages.
- A comparison of **9 automotive brands** and a review of **Honda's WhatsApp chatbot** helped identify gaps in **customer experience** and opportunities for better customer interaction. **58 personalised CTAs** were prepared across **five stages of the customer journey**.
- Work on **WhatsApp CRM, customer follow-ups and dealer performance** provided inputs for recommendations to improve **customer engagement** throughout the buying journey.

Fibe (formerly EarlySalary) – Personal Loan & Instant Cash Loan — **Pune, Maharashtra**

Data Analyst Intern – Customer Analytics — July 2024 – October 2024

- Investigated the relationship between customers' **digital footprints and loan repayment behaviour**, analysing **app usage, SMS transactions and bank statement** data to identify alternative credit risk indicators.
- Compared **Fitness vs. Non-Fitness app users**, analysing **9,189 loan customers** and identifying **lower delinquency among fitness app users (10.4%)** compared to **non-fitness users (15.4%)**.
- Evaluated **Investors vs. Non-Investors** and **Gaming, Gambling & Religious app users vs. non-users** across **47,440 customers,** identifying distinct **repayment patterns**, including **higher delinquency among gambling app users (15.2% vs. 11.9%).**
- Translated **customer insights** across **age, gender, income and city segments** into recommendations for **targeted customer acquisition, personalised financial offerings, cross-selling** and **behaviour-based marketing strategies.**

Education

IILM Lodhi Road — **New Delhi**

PGDM – Marketing & Data Analytics | Pursuing — 2025 – 2027

Dr. D.Y. Patil College — **Pune, Maharashtra**

Bachelor of Science in Biotechnology | CGPA: 8.25 — 2021 – 2024

Academic Projects

Nykaa vs Sephora – SQL-Based Retail & Customer Analytics — October 2026

- Analysed **1.09M+ customer reviews and 12K+ product records** using **SQL to compare pricing, inventory availability, ratings and brand performance**, building a **competitive-positioning** view of the two retailers; **identified stockout patterns, discount strategies and customer-experience** improvement opportunities.

Power BI – Global Superstore Dataset — November 2025

- Built **3 Power BI dashboards** analysing **₹13M sales, ₹1.47M profit and 51K orders**; identified **Technology as the highest-profit category (45%), Standard Class at 60% of orders**, and return concentration by region and segment.

Comparative Financial Statement Analysis – ITC Ltd & Nestlé India — November 2025

- Ran ratio and trend analysis on both companies' income statements, balance sheets and cash flows to assess profitability, liquidity and efficiency.
